

# Timeline: Climate and Customs

From 10,000 BC, cultures adapted clothing, food, and housing to the climate, reflecting how the environment influenced their customs and social changes over time.

**10,000 a.C.**

Neolithic Revolution: It initiates agriculture and sedentary life, marking cultural development influenced by climate and local environment.

**8,000 a.C.**

Mesopotamian cultures developed adobe houses, adapting to the arid climate with constructions that offered thermal protection and conserved resources.

**4,000 a.C.**

In Ancient Egypt, linen garments were used, light and cool, ideal for the hot and dry climate of the Nile Valley.

**3,500 a.C.**

The Indus Valley Civilization used light clothing and diets based on local grains, reflecting adaptation to their climate and available resources.

**1,200 a.C.**

Climate changes in the Mediterranean cause migrations and modifications in crops, affecting Greece and Rome in their food and settlements.
